

SUFFRAGE HAD EARLY ORIGIN

Records of Plotting in Twentieth
Dynasty Are Unearthed

Washington, D. C., June 5.—What was probably the first suffragette plot in history is described by James Halkin in a communication to the National Geographic society, at Washington, D. C., summarizing the more recent excavations and excavations in Egypt which have done much to reveal the history of an ancient world power.

"We have a very full record of the process against certain ladies of the harem of King Ramses II of the twentieth dynasty, which exhibits the harem intrigue in all its familiar features," writes Mr. Halkin. "Officials of the harem are bribed, messengers are sent out to officers of the troops from the secluded ladies, inviting the help of the army to overthrow the king and set up a pretender, and the resources of witchcraft are called in to insure the success of the scheme. In this case even the discovery of the plot did not put an end to the machinations of those concerned. The judges in the trial were tampered with, and the result was a highly creditable exposure of the corruption of the Egyptian bench as well as that of the harem."

Advanced Ideas and Practices.
Continuing his discussion of the position of women in ancient Egypt, Mr. Halkin says:

"Though there are certain features, such as their place in the matter of succession, which shock our modern sense of morality, the ideas and practice of the ancient Egyptians in respect to the position of woman are remarkably advanced and rational, comparing very favorably with those of the great nations of classical antiquity. Woman was to the Egyptian not the slave of man or the minister of his pleasures; she was his companion, his fellow-worker on very equal terms, often his adviser, and frequently his ruler."

Motherhood Was Respected.

"There existed in the Egyptian mind a sentiment that could almost be called reverence for womanhood, particularly in respect of its great function of motherhood—a sentiment which is much more akin to our modern Western view than anything else that we meet with among ancient peoples. The mother was respected for her supreme share in the life and upbringing of her children, and for all the self-sacrifice which is essentially involved in true motherhood, and from the very earliest days the child was carefully indoctrinated with the duty of reverencing and loving the mother who bore and nourished him. So strong was this sentiment that on the tomb of the Old Kingdom the mother of the deceased is, as a rule, represented together with his wife, while the father rarely appears. In noble Egyptian families the general though not universal custom was that the heir of the house was not the eldest son, but the son of the eldest daughter. Under the Middle Kingdom this rule prevailed to such an extent that the inheritance passed from one family to another through females. He who married an heiress gained for his son the inheritance of his father-in-law."

Harems Were Numerous.

"Men of the upper classes had their harems. Pharaoh himself appears in all ages to have been the possessor of a large harem. Under the empire the harem was supervised by an elderly matron, and was administered by high officials—the governor of the royal harem, the architect of the royal harem, the delegate or the harem—while a number of ladies watched over the ladies and guarded them from the outside world. The male to which such an establishment would attach is illustrated by the case of Amenhotep III. When the King of Akkad sent him his daughter Tiddi in marriage, the young lady was accompanied by a train of 217 maidens, who were no doubt added to the royal harem."

Within an area only a few feet larger than Rhode Island the English county of Lancashire supplies the world with 75 per cent of its cotton manufactures.

Prague, Bohemia, now has a population of 600,000.

HATS OF THE SEASON FAVOR THE SHORT AND THE SLENDER WOMAN

BLUE PICOT STRAW HAT.

THE hats of the season are, as a rule, very becoming to the short woman. Their lines add to the apparent height of her figure. The model illustrated here is simplicity itself, the dashing bow of moire ribbon giving the touch of chic that proclaims it Parisian. The hat is of picot straw in a smart shade of blue. The lines of the bow are arranged to harmonize with those of the face and coiffure.

UPPER PENINSULA

Andrews Winning Fame.

Roger M. Andrews, formerly of Monrovia and now president of the Germania Publishing company of Los Angeles, Cal., has been highly honored by the Rotary club of his state, which recently selected him as a delegate to visit the large cities of the United States and England in behalf of the Order of the Golden Wheel and invite them to visit California in 1915, during the exposition.

Trapped Sixty Beavers.

V. D. Andrews, a well-known hunter and trapper, who has resided in Ontonagon county for many years and who also has a farm in lower Michigan, was at County Clerk Garcon's office a few days ago with sixty beaver skins. He had killed four beavers. The skins were excellent specimens. Andrews has gone to Nashville, Mich., where he will spend the summer.

Sponge Found in Abdomen.

Performing an operation on Mrs. A. House of the Lakeside Hotel, L'Ange, says the Upper Peninsula Farmer, Dr. Starnes removed a sponge which had been introduced into an operation performed at one of the county hospitals last December, when Mrs. House was ill with appendicitis. Since the operation she had been in good health. A diagnosis of her condition, which was made by some local physicians, had been correct in the abdomen. The second operation revealed the sponge.

Has Two Bear Cubs.

A H. Hunt of Bonanza has two bear cubs which he captured near Holt's camp. After considerable hard labor, he had killed the mother bear, a week previous and had a long search for the cubs, which he finally found asleep near a dead horse, upon which they had been feeding. He shot one and secured one, the other was sleeping and climbing a tree. After taking the cub to the house, he went back and succeeded in getting the other after cutting down several trees. He expects to dispose of the animals to some party in Milwaukee or Chicago.

Lived to Be Almost a Hundred.

Isaac H. White, aged 95, one of the early pioneer settlers of the district, died at Iron River of old age. He is survived by his widow, eighty-four years of age. To Mr. and Mrs. White were born nineteen children, ten of whom are living. All were at the bedside. Mr. White was born in Carleton, New Brunswick, Canada, Oct. 16, 1818. He followed the occupation of ship carpenter until 1888, when he moved with his family to Stambaugh.

Plow Reveals Bones of Indian.

Wrapped in birch bark the excellently preserved skeleton of an Indian believed to have been buried for more than a half century was unearthed near the Whitelash grange hall, a short distance from Rapid River, by a crew of men grading for the Manistiquette trunk line road. With the skeleton were found a tomahawk, a knife and a small iron kettle, all pointed from iron and evidently having been buried with the body many years ago. A plow was being used and John Cavil was in charge. The worker was thoroughly startled when the skull of a man was

thrown aside. Other workmen were called and a deeper excavation revealed the complete skeleton of a large Indian, together with his weapons and smoking utensils. News of the find was sent to Rapid River and Dr. Conover of that place assumed charge, taking the skull to his office to be preserved.

Threatening Blaze at Furnace Plant.

A nasty accident occurred at the furnace at Newberry the other day. While it did not do much damage, it kept the entire crew busy for several hours. A number of boxes of charcoal caught fire, and with a side of wind blowing the fire was carried all over the yards. The yards are pretty well covered with waste charcoal, and everywhere a live ember was blown a blaze at once sprang up. It was not until after the fire died down that the fire was brought under control. The only damage done was the burning of a couple of lengths of coal.

Soldier Quits Army Service.

Walter Blichartz of Ironwood, who has been a private in the Sixth United States cavalry for the last three years, has returned to Ironwood, his term of enlistment having expired. The home station of the Sixth cavalry is at Des Moines, but the regiment has been engaged in patrol duty along the Mexican border in the vicinity of El Paso and San Antonio for some time. Private Blichartz' honorable discharge papers contain this notation made by the commanding officer: "Service honest and faithful." He will endeavor to procure employment and remain in Ironwood.

SUN HAS A RECORD SPOT.

Weather Will Probably Be Affected by Solar Magnetic Storms.

After a period of comparative quietness, our sun has suddenly developed a spot of tremendous dimensions, and we on earth can hardly fail to feel its effects. From these rents in the photosphere electricity is as it were fired at us, and when they are at the maximum of their cycle, or when, as now, one of unusual size makes its appearance, our world is swept by those strange magnetic storms in which enormous energy altogether imperceptible to our senses is in operation all around us.

We can only know of their existence by the sudden failure of the telegraph to act in its accustomed way, and by the vagaries in which the compass, if such a storm were to reach a certain height, it would blot humanity out of existence. We are undergoing a bombardment which is not the less real because it is invisible and unpalatable, and the calibre of the cosmic gun which is trained upon us transcends all human imagination.

It is in the weather that we shall most probably experience the effects of its discharge. Precisely how a big sun spot affects our weather no one knows, but we have found out enough to be sure that there is some sort of connection between the two. This one is large enough to be seen without the aid of a telescope, so that it ranks among the very largest on record.

RIGHT TO THE POINT.

Kansas City Star: "Miss Ethel," he began, "or Ethel, I mean—I've known you long enough to drop the 'Miss,' haven't I?"

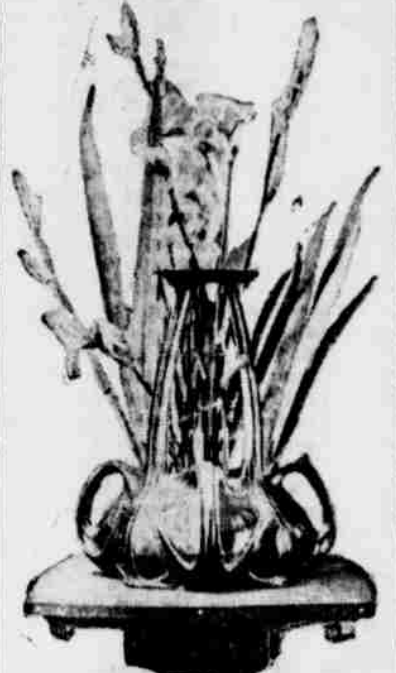

She fixed her lovely eyes upon him with a meaning gaze. "Yes, I think you have," she said. "What prefix do you wish to substitute?"

FLOWERS FOR DECORATING

The Choice of the Vase, Bowl or Basket Is Quite as Important as the Arrangement of the Blossoms and Foliage.

JUNE brings such a wealth of lovely flowers to the woman who lives in the country or the suburbs that she is to be envied at this season. In the house a single rose in a vase makes a beautiful decoration if it is placed there by a discriminating taste. Flower receptacles should be chosen to suit the flower, not the flower to fill the holder.

One secret of arranging flowers prettily is to remember how they grow in their natural surroundings and suit their arrangement to this. A flower

NOVEL FLOWER VASE.

that grows on a long, nodding stem, whose grace is part of its beauty, should be placed in a tall, slender vessel. These may be had in pressed or cut glass. Some of the pottery vases are very useful for this purpose. The vase illustrated here meets this problem very successfully, for it has a bowl which may be well supplied with water, yet has graceful arms, that uphold a little circle that supports the stems of the flowers while they are plainly seen through the side of the vase. This vessel is carried out in dull green ware. Below are two narrow handles.

In choosing the receptacle consider the color of the flower. Pansies set out in a bright blue vase or jack roses arranged in one of the same color are far from restful to the eye or pleasing to good taste, for instance.

HIGH CLASS SOAP.

Its Initial Cost Is Balanced by Its Excellent Service.

An economy for the laundry is the purchase of only high class soaps and laundry blues. Cheap soap has too much alkali, and the clothes slowly disintegrate without one knowing the cause. While a high priced soap may seem extravagant, it is really the wisest economy, as the bars are not placed on the market until properly seasoned, hard and fit to do the work.

If the soap for the weekly wash is cut into small pieces and dissolved overnight or perhaps for a day or two in a jar of cold water a splendid soap jelly will be ready for the making of a sud. This takes out the dirt more easily and quickly than by rubbing the bar of soap on the clothing over a rough washboard, wearing out the garments and wasting the soap.

If there is a washing machine allow a pound of soap to five gallons of water, and add enough of this to make the proper amount of suds for the first cleansing.

Cleaning Paints.

Here is a painter's recipe for cleaning paint and all varnished surfaces, and a very excellent one it is: Add a tablespoonful of salts of tartar to half a bucketful of warm water, wash the paint with a rag dipped in this, using no soap, and it will remove every speck of dirt. Rinse in clear warm water and dry with a chamois.

Freshening the Air.

The air of a room may be freshened by putting a few drops of oil of lavender into a bowl of boiling water and letting it stand until the water is quite cold.

CHERRY SOUFFLE.

Remove the stems and stones from a large cupful of cherries, add two tablespoonfuls of water and stew with a cupful of granulated sugar until tender. Mix two tablespoonfuls of cornstarch with a little cold water and stir into the cherries; cook ten minutes. Take from the fire and add the juice of half a lemon and the stiffly beaten whites of two eggs. Adorn small individual molds with cherries, pour in the mixture, set them in a pan of hot water and bake twenty minutes. Serve with whipped cream.

British India last year bought United States playing cards valued at \$25,382.

MORTGAGE SALE.

DEFAULT having been made in the conditions of a certain mortgage by John A. Makinen and Hilma Makinen, his wife, of the City of Hancock, Michigan, parties of the first part, to the Copper Country Building & Loan Association of Calumet, Michigan, a corporation organized and doing business under the laws of Michigan, party of the second part, bearing date December twenty-fourth, 1912, and recorded in the office of the Register of Deeds for the county of Houghton, Michigan, on the fourteenth day of January, 1913 in Volume "V.V." of Mortgages on page 342, each and every installment of principal and interest of which mortgage is hereby declared to be due and payable immediately and on which said mortgage there is claimed to be due at the date of this notice the sum of Fourteen hundred fifty-two and 77/100 (1452.77) dollars, and no suit or proceedings at law or in equity having been instituted to recover the money secured by said mortgage or any part thereof.

NOW THEREFORE, by virtue of the power of sale contained in said mortgage and the statute in such case made and provided, notice is hereby given that on the fifteenth day of August, A. D. 1914, at 11 o'clock in the forenoon there will be sold at public auction to the highest bidder at the front door of the court house in the village of Houghton, in the county of Houghton, Michigan, (that being the place where the Circuit Court for the said county of Houghton is held) the premises described in said mortgage or so much thereof as may be necessary to pay the amount due on said mortgage with seven per cent. interest and all legal costs as provided for in said mortgage and an attorney fee of thirty-five dollars as also provided for in said mortgage.

The premises described in said Mortgage are all that certain piece or parcel of land situated in the Township of Adams, Houghton county, Michigan, described as follows, to-wit: Lot num-

bered seven (7) of Block numbered nineteen (19) of the First Addition to the Town of South Range, according to the Recorded Plat thereof. Together with the tenements, hereditaments and appurtenances thereunto belonging and thereon situate.

Dated this nineteenth day of May, A. D. 1914.
